

Think SMART.

'SMART options': the machine tool rental scheme from Mills CNC.

SMART options.

Get your Doosan machine the SMART way!

Thinking outside the box is something we do regularly here at Mills. It's also what we do best!

So, in response to these difficult and challenging times, we've developed something new and different for those precision manufacturers who need additional machine tool capacity and capability in the short-term – but who don't want to commit to purchasing a new machine tool at this moment in time.

It's called 'SMART options'.

SMART thinking.

'SMART options' is a unique machine tool rental initiative created by Mills CNC Finance.

The initiative enables manufacturers, like you, to acquire a new, or used, Doosan machine tool on a 12 month rental basis* from Mills CNC Ltd., with the option, at the end of the rental period, to either -:

- **return the machine to us;**
- **purchase the machine and get 100% of the rental payments made to date refunded against the original list price of the machine – and also get FREE:**
 - A full 12 month's additional manufacturer's warranty;
 - A 12 month 360 Preventative Maintenance Contract from Mills;
- **extend the rental period on the machine for a further 12 months.**

SMART and competitive.

Our 'SMART options' rental scheme is amazingly competitive and is offered at a ratio of just £30.00 (monthly payment) per £1,000.00 (list price of the Doosan machine).

So, for example, a new Doosan Lynx 220B lathe is available to rent, through the 'SMART options' machine tool rental scheme, at only £1,170.00 per month!

SMART and straightforward.

The 'SMART options' rental scheme is simple and straightforward. There are no hidden extras or additional upfront charges to worry about.

- No deposit;
- No machine tool delivery or installation charges;
- Full training package is included at no extra cost.

SMART advantages.

Because you have acquired your Doosan machine via our 'SMART options' rental scheme you benefit from the following:

- Off-balance sheet accounting and reporting;
- Rental payments are 100% allowable against your taxable profits.

Act now – look SMART!

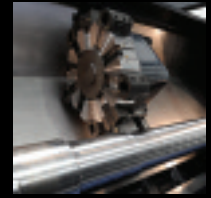

All Doosan machines supplied by Mills are available for rental. You can check-out some of the 'SMART options' we have available in the following pages of this brochure.

If you like the look of anything you see, or if you want to find out about other Doosan machines covered by our 'SMART options' scheme – call Mills CNC on **01926 736736** or visit our website **www.millscnc.co.uk**

* Minimum rental contract is 12 months.

SMART options.

'SMART' Doosan lathes and turning centres.
